Objective

Computer science position utilizing solid training and experience in computer programming, data management, software development, web site design, and systems operations.

Summary

I am a dedicated Computer Science student currently in my **7th semester**, with a strong foundation in both web development and artificial intelligence. I have successfully completed various projects, including web applications using the MERN stack, and a recent football analysis project leveraging the YOLOv8 pre-trained model. My academic and project experience has equipped me with a solid understanding of modern technologies and practical problem-solving skills, preparing me for future challenges in the tech industry.
